

CODE RED'24

# AI Story Teller

Presentated by CURIOUS CODERS

# LEVEL OF INNOVATION

## Creating Stories

- User able to create the story using the prompts
- Time-saving for content creators.
- multi-language out put in storytelling style.
- back ground of the stories were related to the story itself for better experience

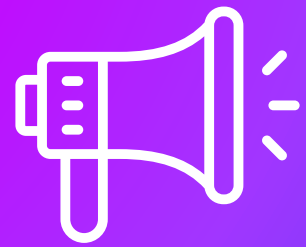

## Story telling

- We are introducing the different kinds of stories of different visual aspects in one place.
- Our software also will be able to recognize the emotions of the readers by which can give better recommendation.
- This also able to recognise the regnal languages.

## Multiplatform

- This can be access by both web and app at a same time.
- It will be free to use and easy to understand.

Originality

## •Your Story, Your Way:

- Users can upload their own stories and the website tailors the narration to match the emotions in the story. One can post the whole story or just gives the prompts.

## •Interactive Storytime:

- Two cool options - you can either be part of the story, choosing what characters say, or just sit back and let the AI read it.

# Realistic Capability

- Making It Work:**

- The technology behind the scenes is realistic and doable.

- Step by Step:**

- We're breaking down the development into clear steps, from the idea to making it real.

- Testing It Right:**

- Before you try it, we'll make sure everything works smoothly.

- Everyone's Part:**

- It's not just us – your feedback will help us make it even better.

# Value Addition

**Title:** What It Brings to You

**Content:**

- Personalized Delight:**

- Feel the joy of stories crafted just for you, making each moment special.

- Beyond Entertainment:**

- Dive into educational tales, interactive quizzes, and animated adventures using simple prompts.

- Community Connection:**

- Join a community where stories connect people, and your creations can inspire others.

- A Journey Together:**

- It's not just a website; it's a shared adventure. Your support makes the journey even more thrilling!
